**Corona crisis – SKS customer information**

At SKS, we are aware that the effects of the corona crisis currently let us all facing major challenges.

For SKS, it is an indispensable principle that the well-being of employees and their families comes first. The protection of health, as well as the protection of the weaker, is, we believe, always a priority.

We responded promptly to the requests and measures taken by the respective governments of the concerned countries to contain the Corona virus. And we have sensitized the employees at the headquarter as well as the employees in the SKS customer centers around the world early on. The recommended measures must be observed with mutual respect.

Most employees can still be reached in the temporary home office. We provide technical support at any time by phone or other electronic media.

We have sufficient parts in stock to supply our customers with spare and wear parts and according to the current status the supply chain is unrestricted.

In order to meet the current economic and organizational restrictions, the Kaiserslautern site will only have a very limited staff in cw 15 and 16.

Deliveries of goods and the provision of spare and wear parts are not affected.

We will of course continue to inform you about adjustments.

We also ask our customers and contacts to refrain from face-to-face meetings and to enable video conferencing in the coming weeks so that we all maintain contact with each other.

Stay healthy!

A handwritten signature in blue ink, appearing to read 'Markus Klein'.
