SKS Weld Package: System design

- 1 Weld process controller + Software
- 2 DCT power source
- 3 Wire feeder
- 4 Bracket / Wire spool holder
- 5 Wire guidance
- 6 Cable bundle / Control cables
- 7 Hand welding torch

Hand welding with robotic quality.

This brochure contains information about the SKS Weld Package, as well as consumables and spare parts. Depending on the welding task, various features of the welding machine components are available.

- Industrial proven robot arc welding technology for hand welding
- Latest process control technology
- Standardized components

The SKS Semi Automatic Weld Package is designed
for the following welding processes, materials and power range:

Processes: MIG/MAG (GMAW), Pulse, MIG Brazing

Wire materials: High-alloy steels, low-alloy steels, aluminum and copper alloys,
nickel-based materials

Wire diameter: 0.8-1.6 mm

Max. power: 420 A - 60 % duty cycle/40 °C, air-cooled

1a Weld process controller

Weld process controller Q4

Weld process controller Q4 as integrated solution into the power source

Weld process controller Q4

The perfect solution for local administration – the weld process controller Q4 provides all basic functions of the Q80. The controllers can be administrated over the USB port with the Q8TOOL4 software. As a small and compact solution for the cost-optimized application, the Q4 is integrated into the power sources LSQ3 or LSQ5.

- Processes/features: MIG/MAG (GMAW), I-Pulse, U-Pulse, KF-Pulse
- Programs: 186
- General functions: Display and saving of readings, alarms
- Monitoring functions: Weld current monitoring, auto compensation, arc and ignition monitoring, motor current, gas and water monitoring
- Ports: USB

Weld process controller Q1

Weld process controller Q1

The Q1 calculates the optimal parameters for each welding process. Only basic data such as material, wire type, wire feed speed and type of gas must be entered.

- Processes/features: MIG/MAG (GMAW), I Pulse, U Pulse
- Jobs: 14
- LCD: Display of measurement values
- Ports: USB/SPW Bus with adapter cable

Power source LSQ3

OPTION

Accessories: Wall mount for LSQ5

Space-saving design that makes for easy cleaning/maintenance.

LSQ5 power source with Direct Control Technology DCT

The LSQ5 ensures the optimum arc energy. It uniquely adjusts to different weld processes. Unlike conventional power sources with inverter technology, the LSQ5 with Direct Control Technology controls its switching transistors without any fixed clock frequency according to the needs of the weld process. Without any delay, the energy needed for the process is provided instantly. The flexible fine tuning is done by a central processor. The CPU continuously analyzes the weld process and current/voltage values on the basis of data obtained and optimally drives the switching transistors of the power section. This results in an extremely high efficiency and a low temperature development.

The power source can be configured with only two buttons and four LED indicators. For world-wide usage, voltages can be configured without opening the power source.

LSQ3 power source with Direct Control Technology (DCT)

The LSQ3 offers enough power reserves for special weld tasks like chassis and exhaust parts and other thin sheet metal applications.

LSQ3: 340 A at 60 % duty cycle/40 °C, 3 x 400 V

LSQ3A: 340 A at 60 % duty cycle/40 °C, 3 x 480 V

LSQ3A	77-1184-10
LSQ5-CCC	77-1185-60
LSQ3-CCC	77-1184-40

The main benefits are:

- DCT provides a speed regulation up to ten times higher compared to conventional inverter technology. This leads to excellent control behavior and shorter response times.
- The weld properties are substantially improved. Software replaces hardware: Fewer components also increase the reliability in continuous operation.

3 Wire feeder

Strong, lightweight and precise.

The PF5 wire feeder.

Smaller and with less weight accompanied by improved efficiency over conventional wire feeders.

Power Feeder PF5

Modern motor, gear and control technology provide a strong performance and highest possible precision. The robust plastic housing is electrically insulated.

The industrial proven Power Feeder PF5 is available with an additional monitoring functionality: an integrated gas-flow sensor. The weld process controller displays the gas flow values, and can also be triggered to an alarm, in case of a non-defined gas flow rate.

Technical data

Weight	3.8 kg
Motor	70W
Wire feeding speed	2.5 - 25 m/min
Roll diameter	0.8 - 1.6 mm

Shielding Gas Saver

The benefit of the shielding gas saver is its pre-regulated working pressure of 1.2 bar / 17 psi (common 4.5 bar / 65 psi). Therefore the ram pressure is reduced, i.e. there are key benefits of the shielding gas saver at ignition of the welding torch and an improved gas saving. The shielding gas saver ensures a constant gas flow during the welding task.

5 Wire guidance polymer for aluminum wires

Please note:

Furhter information can be found in our brochure "Wire guidance" (DOC-0193EN).

With the new SKS polymer guidance, the high efficiency of the whole system extends up to the drum.

Advantages of polymer wire guidance

- Extraordinary good glide properties reduces motor load
- Minimized abrasive wear and reduced dirt in wire feeder and torch system
- Lightweight design and a high inherent stability for easy installation
- Length can be freely chosen by the customer
- Cost optimized exchange: only the polymer conduit must be changed, connectors are reuseable.
- Optimized materials for longer life and reduced downtimes

5 Wire guidance ERC for steel and stainless steel wire materials

- 1 Wire inlet body with quick coupling
- 2 Connection nipple for ERC conduit
- 3 Polymer wire conduit ERC
- 4 Connection for wire drum with inner ceramic inlay

With the ERC wire guidance for steel/stainless steel, the high efficiency of the whole system extends up to the drum.

Advantages

- Very good inherent stability due to thick polyethylene insulating jacket
- Good sliding properties
- Reduced wear by using flat wire for monocoil core
- Suitable for steel and stainless steel wires

7 Hand welding torch

Ergonomic design for optimal handling.

Benefits of robotic arc welding now available for hand welding:

- Long lasting with high quality parts
- High operational times of consumables
- Air-cooled even with heavy duty applications
- Less repairs
- Standard consumables
